

# BIO-FLOW ULTRA

## Concentrated Digestant

- *Minimizes frequency of pump-outs of grease traps.*
- *Environmentally safe – non-pathogenic.*
- *Dual odor-control system **deodorizes** with a floral scent then continues working through bacterial digestion.*

**BIO-FLOW ULTRA** is a convenient and cost-effective concentrated digestant. One-half gallon container of **BIO-FLOW ULTRA** yields 5 gallons of RTU BIO-FLOW. Plus, the smaller, more compact ½ gallon containers are easier to store than 5 gallon pails.

**BIO-FLOW ULTRA's** bacteria are fortified with free-enzymes to aid in rapid digestion of grease trap waste. Grease, oil, complex fats and proteins are quickly broken down into simple water and carbon dioxide. Drains are kept free of clogs.

### Directions:

---

For Restaurants Open 24 Hours:

Drip, pour or pump **BIO-FLOW** directly into drains with Share's Grease Digestor Pump during low flow periods, usually once during the day after lunch and once at night between midnight and 6 a.m. See chart below for daily dosage rates.

For Restaurants Open for Lunch & Dinner Only:

Drip, pour or pump **BIO-FLOW** directly into drains with Share's Grease Digestor Pump between midnight and 6 a.m. See label for daily dosage rates.
