

BIO-PAKS

WATER SOLUBLE PACKETS

Form: Powder

Color: Tan to Brown

Odor: Yeast-like

- Easy to use, water-soluble packets of digesting bacteria avoid inaccurate measuring and messy mixing.
Packets dissolve in water to release powerful bacteria and enzymes.
Organic waste broken down into carbon dioxide and water.
- Non-corrosive, non-toxic bacteria is safe for most systems.
- 5 gal. pail offers 50, ¼ pound packs or 25, 1 pound packs.

For quick and easy bio-remediation of waste water systems, try our convenient **BIO-PAKS**. The water-soluble packets are filled with a pre-measured amount of powerful waste-digesting bacteria. Once they come in contact with water, **BIO-PAKS** instantly dissolve and release bacteria and enzymes into the system. These handy pouches offer an efficient alternative to inaccurate measuring or messy mixing of bacteria. Available in ¼ pound and 1 pound packets, simply count out the number of packets you need and then toss them into your system.

BIO-PAKS are ideal for use in:

Sewage Treatment Plant Lagoons
Manure Pits
Septic Tanks

Grease Traps
Digesters
Settling Tanks

Each **BIO-PAK** contains a distinct blend of bacteria and enzymes that effectively breaks down animal fats, vegetable fats, proteins, starches, cellulose and oils into harmless carbon dioxide and water.
