

BLOCKADE

Invisible Concrete Protector

Form: Liquid

Color: Clear

Odor: Detergent

- Resists water and oil-based staining, keeping your concrete looking like new.
- Invisible, won't change appearance of floors, making it suitable for use on decorative surfaces.
- Low odor formula for use indoors and outdoors.

Oil and water-based spills have met their match! Share's **BLOCKADE** invisible concrete protector with PTFE uses a high-tech, fluoropolymer coating that resists both oil and water-based spills. It won't discolor the surface, change the appearance, or turn yellow, making **BLOCKADE** a truly invisible product. The invisible protection prevents spill absorption and staining, keeping surfaces attractive and easy to clean, simply mop or wipe spill away. It will protect concrete and other porous surfaces such as stone, quarry tile, brick and mortar, grout and granite and many more. **BLOCKADE'S** protection will help keep surfaces looking new, adding years to the life of porous surfaces by reducing spalling, flaking, peeling, dusting and discoloring. Finally, there is an invisible protector that does it all, **BLOCKADE** from Share.

BLOCKADE is great for use on. . .

Concrete
Quarry Tile
Terrazzo
Brick & Mortar
Sandstone
Clay
Concrete Blocks

Granite
Ceramic Tile
Flagstone
Grout
Limestone
Stucco

DIRECTIONS: **BLOCKADE** is easy to apply using a brush, medium nap roller or low-pressure sprayer. The surface to be treated does not need any special treatment but it must be dry and water, oil and dust free to allow proper penetration of the products. **Allow the sealer to impregnate the surface for 5-10 minutes and then remove the excess from the surface (this is the most important step because if the sealer dries on the surface it will leave a residue).** Allow to dry for 2 hours. Re-apply using the same procedure and then remove the excess. The polymer will cure in approximately 24 hours at 60°F. After curing, place a small droplet of water on the surface to check that it beads up and this will indicate that the sealer has satisfactorily cured.

Pre-Cleaning Recommendations (if needed). Any of Share's water soluble cleaners or degreasers. Coverage: **BLOCKADE** will cover approximately 250 to 500 sq. ft. per gallon depending on the concrete porosity and two coats are recommended. Typically a 5-gallon pail will seal 1,000 sq. ft. of poured concrete using two applications.
Life Expectancy: 2-3 years under normal conditions.
