

# CITRA-GEL

## Natural Degreaser

- *Leaves behind **no residues**.*
- *Can be applied by **brush, mop, sponge, spray** or as a solution.*
- ***Emulsifiers** minimize waste run-off.*

Share's **CITRA-GEL**, because of its thixotropic nature, has the ability to cling virtually anywhere to lift and extract grime, even on vertical surfaces. A citrus extract called d'Limonene is used to remove the most resistant grime including grease, tar, oil, asphalt and other similar soiling materials. Once stripped, rinsing emulsifiers surround and suspend loosened debris so that it's easily flushed away with water. Best of all, the d'Limonene found in **CITRA-GEL** also overcomes malodours, leaving behind the fresh, fruity scent of oranges. Stick with Share's **CITRA-GEL** and you'll get stuck on a powerful cleaner that works in the stickiest situations.

### Other Uses:

---

Tar, Asphalt, Grease, Pitch, Roofing Compounds, Spreaders, Heating Pots, Shovels, Rollers, Brooms, Paddles.

### Directions:

---

SHAKE WELL BEFORE USING! Apply **CITRA-GEL** by spraying, dipping, mopping or brushing onto the surface or part to be cleaned. Allow the gel to penetrate for 10 to 15 minutes, then flush with water. For heavy deposits, scrub with a stiff brush to speed removal. **CITRA-GEL** will not harm most paints or vehicle lettering, but always test in an inconspicuous place before using. Test before applying to plastic parts or surfaces.
