

COCO SOAP

Coconut Hand Soap

- *Has a **mild, pleasant** scent that's not overbearing.*
- ***Non-irritating** and non-sensitizing to skin.*
- ***Concentrated** soap can be diluted for **different** uses.*

COCO SOAP hand soap leaves your hands soft. Coconuts produce naturally rich, non-abrasive emollients that wash away dirt without washing away your body's natural oils. This moisturizes your skin, leaving it soft and smooth, yet is strong enough to handle the filthiest hands. Oil, grease, dirt, ink and carbon are no match for **COCO SOAP**. You can safely use it to wash your entire body -- even your hair. When you need a soap that has the right ingredients for your skin, get **COCO SOAP** from Share.

Other Uses:

Churches, Banks, Schools, Hospitals & Nursing Homes, Department Stores, Factories, Food Processing Plants can use as a soap as well as a Food Conveyor Lubricant

Directions:

For use in liquid soap dispensers: Dilute 1 part **COCO SOAP** with up to 7 parts water. For removing light shop oils: Dilute 1 part **COCO SOAP** with 1 part water. For all-over body cleaning: Dilute 1 part **COCO SOAP** with 5 to 7 parts of water.
