

CONTACT CLEANER

ELECTRICAL CONTACT DEGREASER

Form: Aerosol Liquid **Color:** Colorless **Odor:** Solvent

- High purity dichlorofluoroethane is fast drying and non-conductive - excellent for use on motors, electrical or electronic devices and delicate instruments.
- Quickly cleans and degreases without leaving a residue making it ideal for use on precision mechanical assemblies.
- Colorless, non-staining, non-corrosive and non-conductive.

When your electrical components aren't properly conducting a current, its time to look at your contacts. This versatile aerosol cleaner contains dichlorofluoroethane which allows you to use it on both electrical and mechanical assemblies. A simple squirt of the solvent clears away dirt, soil and grease on electronic circuitry and sensitive mechanical equipment. While strong enough to dislodge soils and debris, **CONTACT CLEANER** won't harm fragile plastic parts or painted surfaces.

Ideal for cleaning . . .

Cash Registers	Scientific Instruments
Typewriters	Electrical Contacts
Telecommunications Equipment	Circuit Boards
Computer Equipment	Vending Machines

DIRECTIONS: Spray **CONTACT CLEANER** directly on part or contact to be cleaned and saturate to flush away accumulated debris. Operate switches or relays to assure complete cleaning. Current does not have to be removed during use of this cleaner. **CONTACT CLEANER** will not harm most painted surfaces or plastic surfaces so it may be used safely on most types of enclosures, mountings and circuit boards. Always test the compatibility of **CONTACT CLEANER** with these surfaces in an inconspicuous place before using.
