

# DUST MOP TREATMENT

## AEROSOL

**Form:** Spray

**Color:** Clear

**Odor:** Citrus

- Use on dust cloths--picks up dust like a magnet prevents dust from scattering.
- Spray door rugs and entry mats--holds dirt like a magnet--removes dirt and moisture from bottom of shoes.
- Spray on air conditioner filters after cleaning--holds dust and pollen on filters--prevents dust and pollen from entering room.

This water-based dust mop treatment penetrates deeply into rugs, dust cloths, mops and brooms. Leaves surfaces shiny without the presence of silicones or waxes or the slippery coatings they leave behind. It attracts dirt and dust and converts it to a heavy lint that can be easily shaken out or machine washed. Use of dust mop treatment replaces sweeping compounds and eliminates the dust created when using a push broom. Can also be used as a felt or dressing on air conditioning filters to prevent pollen and germ-laden dust from entering rooms. **DUST MOP TREATMENT** can be used on vinyl, linoleum, concrete, gym and tile floors.

Use **DUST MOP TREATMENT** on . . .

Woodwork

Furniture

Paneling

Cabinets

Table Tops

Wood Floors

Paddle Fans

Window Frames

Venetian Blinds

Window Sills

Radiators

Door Rugs

Entry Mats

Air Conditioning Filters

### **DIRECTIONS:**

Remove cap. Hold can 6 to 8 inches from dust mop or cloth, and spray lightly over entire mop or dust cloth. Dust in regular way. Apply spray to mop or cloth as often as needed--at least once a week.
