

# **FOAM MARKER DYE**

## **FOR USE WITH AGRICULTURAL FOAM MARKING SYSTEMS**

**Form:** Clear Liquid    **Color:** Red, Blue    **Odor:** None

- Mixes readily with water at 1 pint per 50 gallons of mixed foam solution.
- Will not stain application equipment, tanks, lines or other items contacted.
- Does not leave behind residues which could affect the soil or plants.

**FOAM MARKER DYE** is a highly concentrated colorant that has been designed to aid the applicator by improving the visibility of foam marking concentrates during times of darkened conditions or when used on fields that are stubble covered. **FOAM MARKER DYE** mixes readily with water, is non-staining and will not leave behind any residues that might be harmful to plants or to the soil. **FOAM MARKER DYE** is compatible with most commonly used agricultural foam marking concentrates. **FOAM MARKER DYE** is available in two popular colors: Red, Blue.

**FOAM MARKER DYE** is a highly concentrated, liquid colorant developed to aid the applicator by providing better visibility of agricultural marking foams in darkness or on stubble covered fields. **FOAM MARKER DYE** will mix easily with water to provide a solution which is non-staining and will not leave any residues behind which could affect the soil or plants. **FOAM MARKER DYE** is compatible with most commercial foaming agents.

**DIRECTIONS FOR USE:** Use 16 ounces (1 pint) of **FOAM MARKER DYE** for each 40 to 50 gallons of mixed foam solution. Add foam marker concentrate to a clean tank and fill with water or follow directions on the foam concentrate label. Add **FOAM MARKER DYE** last into marking solution.
