

FOOD GRADE GREASE

Form: Solid **Color:** White **Odor:** Petroleum

- Retains excellent heat reversion characteristics while also preventing rust and corrosion.
- Use it on all equipment to eliminate the danger of using the wrong grease.
- Ideal for meat and poultry plants, food processing plants, bakers, restaurants, etc.

Don't take the chance of letting hazardous lubricants contaminate edibles in food processing plants. Use FOOD GRADE GREASE instead. This completely waterproof lubricant has a high temperature shear stability, making it an outstanding lubricant for use on all plant equipment. While highly stable, GOOD GRADE GREASE is made with mineral oil and poses no hazard if it makes accidental contact with food products. It's also a long-lasting lubricant and designed to withstand the rigors of high performance equipment. Packaged in 14.5 ounce cartridges, FOOD GRADE GREASE fits all standard grease guns for quick and simple application.
