

FOUR WAY ACTION AEROSOL

Aerosol Moisture Guard

- *Special barium soap **corrosion inhibitors** protect electrical systems **against moisture**.*
- ***Advanced** penetrants and lubricants create a **superior** formula.*
- *Apply to guard circuit breakers, terminals, junction boxes, ignition systems, switches, motor winding, power transformers, controls and other electrical components.*

When you need to get rust-locked parts moving again, your first move should be to get **FOUR WAY ACTION AEROSOL** from Share. Advanced penetrants and lubricants have been combined to create a superior formula. It penetrates easily to dissolve oxidation deposits and loosen frozen components within minutes. Once it permeates rust deposits, **FOUR WAY ACTION AEROSOL** lubricates parts to reduce friction and eliminate annoying squeaks. Another quality that sets it apart from ordinary lubricants is its ability to form a protective seal that displaces and prohibits moisture from corroding metal surfaces. With the ability to resist moisture, **FOUR WAY ACTION AEROSOL** helps to reduce problems that arise with electronic and electrical equipment exposed to dampness.

Other Uses:

Cable Guard, Rust Preventer, Cutting Oil, Tapping Fluid, Ignition Systems Waterproofer, Fire Hydrant Lube, Hunting Rifle Lubricant, Fishing Reel Lubricant

Directions:

Shake **FOUR WAY ACTION AEROSOL** well before using. Hold nozzle 8 to 12 inches from surface to be treated. Spray generously onto surface. Reapply as necessary.
