

MACHINE DISHWASHING POWDER

Automatic Dishwashing Powder

- *Safe to use on glass, porcelain, metal, plastic and even earthenware.*
- *A **special blend** of ingredients makes it effective in hard water.*
- *Ideal for use in restaurants, diners, hotels, motels, resorts, hospitals, nursing homes, etc.*

MACHINE DISHWASHING POWDER from Share is a powerful detergent developed specifically for automatic dishwashing machines. With a combination of ingredients including chlorine, cleaning agents and sequestering agents, it generates thick suds that strip dishes clean of food deposits, grease and even crusty, dried-on food. With **MACHINE DISHWASHING POWDER**, you'll see clean, sparkling glasses, dishes, silverware, pots and pans. Also, its special cleaning ingredients won't leave spots and streaks like most dishwashing soaps.

Other Uses:

(dilution)

Dairy Equipment Cleaner (2oz/gal), Cooling Tower Cleaner (2oz/gal), Canning Plant Cleaner (2 oz/gal), Laundry Detergent with Bleach (2oz/load), Steam Table Cleaner (2oz/gal), Meat Locker Cleaner (2 oz/gal), Mildew Stain Remover (2oz/gal), Egg Wash Equipment Cleaner (2oz/gal).

Directions:

Rack dishes and pre-rinse. Use 1/3-ounce of **MACHINE DISHWASHING POWDER** per gallon of water in the wash tank for continuous feeding equipment. Powder feeding equipment should be kept charged with detergent. If there is no detergent-feeding equipment, add one heaping teaspoon of detergent for each rack of dishes. Hard water areas may require additional amounts of detergent. After washing, rinse dishes with HOT water (180F. or above). **MACHINE DISHWASHING POWDER** is not intended for use in hand washing operations.
