

MACHINE DISHWASHING POWDER

AUTOMATIC DISHWASHING POWDER

Form: Powder

Color: White

Odor: Slight Chlorine

- Safe to use on glass, porcelain, metal, plastic and even earthenware.
- A special blend of ingredients makes it effective in hard water.
- Ideal for use in restaurants, diners, hotels, motels, resorts, hospitals, nursing homes, etc.

MACHINE DISHWASHING POWDER from Share is a powerful detergent developed specifically for automatic dishwashing machines. With a combination of ingredients including chlorine, cleaning agents and sequestering agents, it generates thick suds that strip dishes clean of food deposits, grease and even crusty, dried-on food. With **MACHINE DISHWASHING POWDER**, you'll see clean, sparkling glasses, dishes, silverware, pots and pans. Also, its special cleaning ingredients won't leave spots and streaks like most dishwashing soaps.

Other **MACHINE DISHWASHING POWDER** Uses . . .

Dairy Equipment Cleaner

Use 2 ounces per gallon.

Cooling Tower Cleaner

Use 2 ounces per gallon.

Canning Plant Cleaner

Use 2 ounces per gallon.

Laundry Detergent with Bleach

Use 2 ounces per load.

Steam Table Cleaner

Use 2 ounces per gallon.

Meat Locker Cleaner

Use 2 ounces per gallon.

Mildew Stain Remover

Use 2 ounces per gallon.

Egg Wash Equipment Cleaner

Use 2 ounces per gallon.

DIRECTIONS: Rack dishes and pre-rinse. Use 1/3-ounce of **MACHINE DISHWASHING POWDER** per gallon of water in the wash tank for continuous feeding equipment. Powder feeding equipment should be kept charged with detergent. If there is no detergent-feeding equipment, add one heaping teaspoon of detergent for each rack of dishes. Hard water areas may require additional amounts of detergent. After washing, rinse dishes with HOT water (180°F. or above). **MACHINE DISHWASHING POWDER** is not intended for use in hand washing operations.
