

# NATURAL FLOATING LIFTSTATION DEGREASER

## SEWAGE BUILD-UP REMOVER

**Form:** Liquid

**Color:** Red

**Odor:** Citrus

- Distilled from plant and vegetable material. Contains no petroleum distillates or chlorinated hydrocarbons.
- Special pigment indicator provides easy visual verification of level in lift stations.
- Ideal for sanitary and storm sewers, lift stations and sewage treatment plants.

When grease build-up begins to overwhelm lift stations, it's always been difficult to find a solvent that's powerful enough to clear waste but won't harm surrounding equipment. Once you find **NATURAL FLOATING LIFT STATION DEGREASER** from Share, it will be the only solvent you will ever use. Made from organic material that eliminates organic waste build-up, this biodegradable degreaser floats on the surface of waste water so the rising and falling action of the water allows it to quickly go to work. **NATURAL FLOATING LIFT STATION DEGREASER** penetrates fats, grease and dirt to strip them away from surfaces while eliminating foul odors. In their place, **NATURAL FLOATING LIFT STATION DEGREASER** leaves behind the fresh, clean scent of oranges. When lift stations need to have greases and fats lifted and removed, use the all natural solvent from Share, **NATURAL FLOATING LIFT STATION DEGREASER**.

Other **NATURAL FLOATING LIFTSTATION DEGREASER** uses . . .

Electric Motor Cleaner

Grease Trap Maintenance

Parts Washer Solvent

Generator Degreaser

Floating Vault Toilet Deodorant

Cable Cleaner

Garbage Truck Deodorant

**DIRECTIONS:** Use 1/2 gallon of **NATURAL FLOATING LIFT STATION DEGREASER** for each square foot of water surface area. Spray or pour directly down side of lift station walls when water level is at its lowest. A built-in color level indicator allows the operator to determine product level by visual inspection. It is recommended to maintain a 1 to 2 inch layer of **NATURAL FLOATING LIFT STATION DEGREASER** at all times.

**DEMO/TIPS:** Carry a mixture of water and lift station degreaser in a baby food jar to demonstrate the quick separation by vigorously shaking the jar and setting it down so the customer can view.
