

ORGANIC TAR REMOVER (OECS)

All Natural Citrus Tar Remover

- Formulated with penetrating, dispersing and **non-foaming** emulsifying agents.
- Contains **no petroleum distillates** or **chlorinated hydrocarbons**.
- Emits **non harmful** or unpleasant vapours making it safe to use in confined areas and leaves behind a **pleasing scent** of freshly squeezed oranges.

Tar removal is a job nobody wants to get stuck with. It's not only messy, but also dangerous when handling hazardous solvents. Share's **ORGANIC TAR REMOVER - ECONO**, made from natural citrus extracts, is an organic, biodegradable cleaner, making it one of the safest tar removers on the market. Don't be fooled into thinking that a solvent made from oranges won't be able to cut through thick, tacky tar. The potent citrus ingredient d'Limonene gives **ORGANIC TAR REMOVER – ECONO** the strength to penetrate and soften your worst tar deposits. Even dried tar is loosened and dissolved with a single treatment. So when you have a tough tar removing project, get the solvent that can pull it off -- **ORGANIC TAR REMOVER** from Share.

Other Uses:

(dilution)

Cosmoline Remover (Full Strength), Drain Maintainer (Full Strength), Citrus Odour Control (As needed), Gum Remover (Full Strength), Wax Remover (Full Strength), Sewage Degreaser/ Deodorant (2% solution & spray over sewage beds), Laundry Pre-Spotter (Full Strength), Kitchen Degreaser (1:30).

Directions:

Apply **ORGANIC TAR REMOVER - ECONO** to the affected area in concentrated form by pressure sprayer, or by mopping onto the surface. Allow time for **ORGANIC TAR REMOVER – ECONO** to penetrate and dissolve the tar, asphalt or bituminum deposits for approximately 5 to 10 minutes, then rinse off with water under pressure.
