

REVITALIZE

SPRAY BUFF CONCENTRATE

Form: Liquid

Color: Clear

Odor: Pleasant Citrus

- An economical alternative to stripping and refinishing floors that have lost their lustrous shine.
- Provides lubrication necessary for buffing pads.
- Increases protection of the neutral surface of your floors.

Before you spend an excessive amount of money on stripping and refinishing your floor, use **REVITALIZE** spray buff maintainer. A ready-to-use spray, **REVITALIZE** provides three ways to economically restore your floor's original finish. First, **REVITALIZE** removes marks, stains and scuffs (no matter how dark they may be) with its special blend of detergents. Second, it contains the same cross-linked polymers found in Emerald and Sapphire finishes, so it restores a floor's "wet look" shine. It will not haze or yellow the existing finish like ordinary cleaners. Third, **REVITALIZE** acts as a topical protectant that resists harsh detergents as it protects against daily wear and tear. Restore the shimmer of precious stones to your finish with the regular use of **REVITALIZE** spray buff maintainer.

Use **REVITALIZE** on such floors as . . .

Ceramic Tile
Slate
Vinyl
Cork

Rubber
Linoleum
Concrete

DIRECTIONS: For best results, sweep the floor with a treated mop if light soil is present. If heavy soil is present, damp mop with a solution of WASH from Share Canada. Lightly spray a fine mist of **REVITALIZE** ahead of buffing equipment.
