

RINSE AID

CONCENTRATED RINSE ADDITIVE

Form: Liquid **Color:** Blue **Odor:** Acid

- Water dries quickly without the need to wipe dishes with a towel.
- Eliminates water from spotting on crystal, silver, china and every day tableware.
- Special ingredients allow it to work in either hard or soft water and its environmentally safe formula is biodegradeable.

RINSE AID from Share is a concentrated additive designed for use in the rinse water of dishwashing operations. It reduces the surface tension of water to prevent water droplets from forming on crystal, silverware, china and every day tableware. This allows dishes, utensils and glasses to dry without spots for a sparkling shine. **RINSE AID** contains special water softeners that allow for superior performance in hard water. For water that won't cling and readily evaporates, get **RINSE AID** from Share.

Other **RINSE AID** Uses . . .

Neutral Cleaner

Use at a 1 to 40 dilution.

Salt Residue Remover

Use at 1 to 60 dilution.

Uric Acid Remover

Apply full strength.

Shower Cleaner

Use at a 1 to 20 dilution.

Ice Machine Delimer

Use at a 1 to 30 dilution.

Milk Stone Remover

Apply full strength.

Stainless Steel Cleaner

Use at a 1 to 30 dilution.

Aluminum Cleaner

Use at a 1 to 30 dilution.

DIRECTIONS: For machines equipped with automatic rinse injectors, keep liquid reservoir filled according to the manufacturer's recommendations. Adjust the feed rate of **RINSE AID** to the smallest amount that gives the desired results. For machines without rinse injectors, add one teaspoon of **RINSE AID** to the final rinse. For hand washing, use one teaspoon per 3 gallons of hot rinse water.
