

SHINE ON POLISH

SILICONIZED PROTECTIVE POLISH

Form: Liquid

Color: White

Odor: Bland

- Maximum shine and protection is achieved with minimal rubbing or pressure.
- Formulated with a blend of cleaners, waxes and silicone polymer protectants.
- Can be applied evenly onto surfaces by pouring onto a dust cloth and polishing in a circular motion or misted with a spray bottle and wiped away.

SHINE ON POLISH from Share is a silicone polish designed to lift away the dust, grime and residue that collects on frequently handled appliances and equipment. **SHINE ON POLISH** restores a shiny luster to dull, filthy surfaces. Use it to rejuvenate and preserve finer surfaces such as wood and leather, as well as more durable materials including metal, plastic, vinyl, Formica and glass. Whether you're cleaning a glass TV screen or a metal door screen, all you need is one product - **SHINE ON POLISH** from Share.

Ideal for use on. . .

Wood

Metal

Plastic

Leather

Vinyl

Formica

Automobiles

Glass

DIRECTIONS: Shake well and pour onto a soft, damp cloth. Apply to surface and before **SHINE ON POLISH** completely dries, polish lightly with a dry, soft cheesecloth or toweling.

DEMTO/TIP: Pour onto a dust cloth and apply evenly, polishing in a circular motion or mist with a spray bottle and wipe away.
