

# SOLID AIR CONDITIONER TREATMENT

**Form:** Solid

**Color:** White

**Odor:** N/A

- Rust inhibiting.
- Bio-degradable.
- Nonflammable.

**SOLID AIR CONDITIONING TREATMENT** consists of a special formulation of chemicals in a controlled-dispersal tablet form. As the tablet dissolves, it prevents the accumulation of rust, corrosion, sludge, airborne, dust and slime in condensation pans and drains. One treatment will prevent condensate drain stoppage and reduce odors from the pan for up to a month. Easy to use, store and handle. Regular use prevents overflow damage and unnecessary maintenance repairs.

**DIRECTIONS:** Remove tablet from foil skin and place in condensate pan as far from drain as possible. One tablet for each square foot of pan area. Replace tablet when depleted.
