

TRIPLE X SEWER COMPOUND

Extra Strength Municipal Sewer Cleaner

- An **added dye** is released when mixed into sewage streams to indicate when blockages have been freed and to **assist with tracking flow**.
- Dissolves and liquifies **all organic clogs** including animal and vegetable fats and oils, hair, paper and other protein and carbohydrates.
- Releases **no flammable gases or vapours**.

For normal blockages in drains and sewers, you can use Share's **TRIPLE X SEWER COMPOUND** formula. In extreme cases where clogs are impossible to discharge, you have to turn the heat up a notch. Nothing is as hot as **TRIPLE X SEWER COMPOUND**. This is the most effective drain clog remover available, capable of pushing through the most stubborn organic deposits. The highly reactive ingredients in **TRIPLE X SEWER COMPOUND** create an exothermic reaction when mixed with water so clogs begin to heat up and churn until they are freed from pipe walls. The same chemical reaction occurs to clear blockages in sewage lines when waste becomes too congested to flow freely. For greater power, heat and agitation, get the clog cleaner, use **TRIPLE X SEWER COMPOUND** from Share.

Other Uses:

Animal Fats, Vegetable Fats, Oil, Hair, Paper, Organic Matter

Directions:

Use 15 to 25 pounds of **TRIPLE X SEWER COMPOUND**, depending upon size of blocked sewer line. Pour or shovel into manholes up stream and closest to the obstruction. A second addition following the first by 10 to 15 minutes, may be necessary for removing the more difficult obstructions.
