

UNI-TAB®

With Enzymes

Form: Solid **Color:** Green, Pink or Blue **Odor:** Green Apple, Blue Spice

- **UNI-TAB®** with enzymes also helps keep the drain lines clear and free-flowing by depositing a micro-thin coating that seals and protects, and by releasing an enzyme that digests organic materials.
- **UNI-TAB®** with enzymes lasts an average of 30 days, under normal conditions, due to its unique design that protects the chemical block from excessive erosion caused by rushing water as well as debris dropped into the fixture.

UNI-TAB® with Enzymes is a complete urinal maintenance system in a disposable one-piece unit. So unique a patent has been applied for.

Each time the fixture is flushed, a pre-measured amount of chemical compounds, enzymes and powerful cleansers are released that descale, delime, prevent bacteria growth, deodorize and maintain the fixture and drain lines.

UNI-TAB® with enzymes attacks urinal odors to ways: by removing the source of the odor, uric salts that accumulate in the drain and by dispensing a mild, pleasant scent.

DIRECTIONS FOR USE: Clean the fixture, then place the **UNI-TAB®** with enzymes in the fixture, with the exposed face of the chemical block face down.
