

## LIQUID ICE MELTER GF

- *Improves performance and longevity of solid rock salt and sand when applied prior to their use.*
- *Use as **pre-wetter** before precipitation or **after** snow and ice has already accumulated.*
- *works to a temperature of **-60 degrees F.***

**LIQUID ICE MELTER GF** is the economical way to stay ahead of winter storms to ensure safe transit of pedestrian and vehicle traffic. When used as a pre-treatment, **LIQUID ICE MELTER GF** will prevent the bonding of snow and ice to pavement and other surfaces which will make mechanical clearing much more efficient. With efficacy down to -60°F, ; **LIQUID ICE MELTER GF** is also extremely effective at melting already present snow and ice on a multitude of surfaces.

### Other Uses:

---

Parking Lots, Sidewalks, Gravel Road, Outdoor Conveyors, Outdoor Elevators, Construction Sites, Driveways, Asphalt, Stairs, Bridges.

### Directions:

---

ANTI-ICER/PRE-WETTER: Spray on pavement before precipitation, Use 1/2 gallon/1000 square feet. Adjust dilution on requirement.

DEICER: Effective deicer when applied on top of snow and ice. On glaze ice it may be necessary to score the surface in several places before applying to aid penetration and the prevent run-off. More than one application may be necessary in extreme conditions. Use 1-2 gallons/1000square feet near 32°F on thin ice. Use 3-6 gallons/1000 square feet below 10°F.

ACCELERATOR: Significantly improves the performance and longevity of solid rock salt and abrasives like sand. Use 1/2 gallon/1000 square feet. Adjust dilution depending on requirement.
